Subject index

Active transport
Active transport of protons and electrons driven by redox enzyme reactions via a co-factor shuttle (NADH/NAD), a model: kinetics of activity and evolution of redox potential gradients (Demmano et al.) 271
Adenine
Accumulation of adenine and guanine as Cu^+ compounds at glassy carbon electrodes followed by anodic stripping voltammetry (Shiraishi, Takahashi) 203
Aggregation
Electrorotation behavior of aggregated particles. A theoretical study (Donath et al.) 115
Amperometric Phenol
A new strategy for the construction of a tyrosinase-based amperometric phenol and *o*-diphenol sensor (Cosnier, Innocent) 147
Anodic stripping voltammetry
Accumulation of adenine and guanine as Cu^+ compounds at glassy carbon electrodes followed by anodic stripping voltammetry (Shiraishi, Takahashi) 203
Aprotic solvents
Reaction entropies for the O_2/O_2^- redox couple in aprotic solvents (Ohsaka et al.) 289
Atrazin
Interaction between a sulfolipid of the thylakoid membrane and atrazin (Temsamani et al.) 179

Barley
Electrorotation of barley mesophyll protoplasts (Kakutani et al.) 85
Bilayer lipid membrane
Conformational change of photochromic spirobenzopyran in a bilayer lipid membrane observed via the current of ion-carriers (Toyama et al.) 161

Capacitance
Electrorotation behavior of aggregated particles. A theoretical study (Donath et al.) 115
Cell geometry
Electrorotation of non-spherical cells: theory for ellipsoidal cells with an arbitrary number of shells (Kakutani et al.) 131
Cell lysate
Regularities of separate and combined effects of circularly polarized millimeter waves on *E. coli* cells at different phases of culture growth (Belyaev et al.) 49
Cell metabolism
Electrostimulation of cell metabolism by low frequency electric and electromagnetic fields (Berg) 1
Channel closing
Mechanism of channel opening and closing: a hypothesis (Miller) 323
Channel model
Mechanism of channel opening and closing: a hypothesis (Miller) 323
Channel opening
Mechanism of channel opening and closing: a hypothesis (Miller) 323
Circular dichroic spectroelectrochemistry
Investigation of the electrochemical behavior of tryptophan by in situ circular dichroic spectroelectrochemistry (Zhu et al.) 301
Conductance
Electrorotation behavior of aggregated particles. A theoretical study (Donath et al.) 115

Dehydrogenase
Active transport of protons and electrons driven by redox enzyme reactions via a co-factor shuttle (NADH/NAD), a model: kinetics of activity and evolution of redox potential gradients (Demmano et al.) 271

Dielectric continuum model
Reaction entropies for the O_2/O_2^- redox couple in aprotic solvents (Ohsaka et al.) 289
Dielectric spectroscopy
Electrorotation behavior of aggregated particles. A theoretical study (Donath et al.) 115
Digitalization
Exogenous uptake and release of molecules by electroloaded cells: a digitized videomicroscopy study (Sixou, Teissié) 237
DNA–protein complex
Regularities of separate and combined effects of circularly polarized millimeter waves on *E. coli* cells at different phases of culture growth (Belyaev et al.) 49
Drosophila melanogaster
Transcription in *Drosophila melanogaster* salivary gland cells is altered following exposure to low frequency electromagnetic fields: analysis of chromosomes 2R and 2L (Weisbrot et al.) 39
Drugs
Drug ion transfer across an oil–water interface and pharmacological activity (Arai et al.) 65

Electrical breakdown
Electroporation of excised membrane patches from neuroblastoma cells: demonstration of single pores (Stockbridge) 259
Electrical gradient
Sugar absorption and potassium channels in protoplasts of *Hevea brasiliensis* laticiferous vessels (Bouteau et al.) 213
Electrical parameters
Pre-irradiated photo-oxidized psoralen induces hemolysis and changes in electrical parameters of erythrocyte membranes (Wunderlich et al.) 193
Electric fields
Electrostimulation of cell metabolism by low frequency electric and electromagnetic fields (Berg) 1
Electrochemical serum biosensor
Influence of polymer preadsorption on the performance of an electrochemical serum biosensor (Brett et al.) 311
Electroloading
Exogenous uptake and release of molecules by electroloaded cells: a digitized videomicroscopy study (Sixou, Teissié) 237
Electromagnetic fields
Electrostimulation of cell metabolism by low frequency electric and electromagnetic fields (Berg) 1
Similarities in the proteins synthesized by *Sciara* salivary gland cells in response to electromagnetic fields and to heat shock (Blank et al.) 27
The effect of low frequency electric and magnetic fields on gene expression in *Saccharomyces cerevisiae* (Weisbrot et al.) 167
Electropermeabilization
Effect of electrical energy on the electropermeabilization of yeast cells (Muraji et al.) 77
Electroporation
Effect of electrical energy on the electropermeabilization of yeast cells (Muraji et al.) 77
Electroporation of excised membrane patches from neuroblastoma cells: demonstration of single pores (Stockbridge) 259
Electrorotation
Electrorotation of barley mesophyll protoplasts (Kakutani et al.) 85
Electrorotation behavior of aggregated particles. A theoretical study (Donath et al.) 115
Electrorotation of non-spherical cells: theory for ellipsoidal cells with an arbitrary number of shells (Kakutani et al.) 131
Electrostimulation
The effect of low frequency electric and magnetic fields on gene expression in *Saccharomyces cerevisiae* (Weisbrot et al.) 167
Electrostriction
Electrostriction of lipid bilayers on a solid support. Influence of hydrocarbon solvent and d.c. voltage (Hianik et al.) 99
Ellipsoidal cells
Electrorotation of non-spherical cells: theory for ellipsoidal cells with an arbitrary number of shells (Kakutani et al.) 131
Energy dependence
Effect of electrical energy on the electropermeabilization of yeast cells (Muraji et al.) 77
Enzyme
Active transport of protons and electrons driven by redox enzyme reactions via a cofactor shuttle (NADH/NAD), a model: kinetics of activity and evolution of redox potential gradients (Demmano et al.) 271
Erythrocyte membranes
Pre-irradiated photo-oxidized psoralen induces hemolysis and changes in electrical

parameters of erythrocyte membranes (Wunderlich et al.) 193

Exocytosis
Electrorotation behavior of aggregated particles. A theoretical study (Donath et al.) 115

Fluorescence microscopy
Exogenous uptake and release of molecules by electroloaded cells: a digitized videomicroscopy study (Sixou, Teissié) 237

Gene expression
The effect of low frequency electric and magnetic fields on gene expression in *Saccharomyces cerevisiae* (Weisbrot et al.) 167

Genome
Regularities of separate and combined effects of circularly polarized millimeter waves on *E. coli* cells at different phases of culture growth (Belyaev et al.) 49

Glassy carbon electrodes
Accumulation of adenine and guanine as Cu^+ compounds at glassy carbon electrodes followed by anodic stripping voltammetry (Shiraishi, Takahashi) 203

Guanine
Accumulation of adenine and guanine as Cu^+ compounds at glassy carbon electrodes followed by anodic stripping voltammetry (Shiraishi, Takahashi) 203

H^+–ATPase pump
Sugar absorption and potassium channels in protoplasts of *Hevea brasiliensis* laticiferous vessels (Bouteau et al.) 213

Heat shock
Similarities in the proteins synthesized by *Sciara* salivary gland cells in response to electromagnetic fields and to heat shock (Blank et al.) 27

Hemolysis
Pre-irradiated photo-oxidized psoralen induces hemolysis and changes in electrical parameters of erythrocyte membranes (Wunderlich et al.) 193
Sugar absorption and potassium channels in protoplasts of *Hevea brasiliensis* laticiferous vessels (Bouteau et al.) 213

Hydrocarbon
Electrostriction of lipid bilayers on a solid support. Influence of hydrocarbon solvent and d.c. voltage (Hianik et al.) 99

Hydrophobicity
Drug ion transfer across an oil–water interface and pharmacological activity (Arai et al.) 65

Ion-transfer voltammetry
Drug ion transfer across an oil–water interface and pharmacological activity (Arai et al.) 65

Laticiferous vessels
Sugar absorption and potassium channels in protoplasts of *Hevea brasiliensis* laticiferous vessels (Bouteau et al.) 213

Lipid bilayers
Electrostriction of lipid bilayers on a solid support. Influence of hydrocarbon solvent and d.c. voltage (Hianik et al.) 99

Membrane capacitance
Electrorotation of barley mesophyll protoplasts (Kakutani et al.) 85

Microwave bioaction
Regularities of separate and combined effects of circularly polarized millimeter waves on *E. coli* cells at different phases of culture growth (Belyaev et al.) 49

Model
Active transport of protons and electrons driven by redox enzyme reactions via a cofactor shuttle (NADH/NAD), a model: kinetics of activity and evolution of redox potential gradients (Demmano et al.) 271

Multishelled ellipsoidal cells
Electrorotation of non-spherical cells: theory for ellipsoidal cells with an arbitrary number of shells (Kakutani et al.) 131

O_2/O_2^- redox couple
Reaction entropies for the O_2/O_2^- redox couple in aprotic solvents (Ohsaka et al.) 289

Oil water interface
Drug ion transfer across an oil–water interface and pharmacological activity (Arai et al.) 65

Patch clamp
Electroporation of excised membrane patches from neuroblastoma cells: demonstration of single pores (Stockbridge) 259

Pharmacological activity
Drug ion transfer across an oil–water interface and pharmacological activity (Arai et al.) 65
Phloxine B incorporated
Effect of electrical energy on the electropermeabilization of yeast cells (Muraji et al.) 77
Photo-oxidation
Pre-irradiated photo-oxidized psoralen induces hemolysis and changes in electrical parameters of erythrocyte membranes (Wunderlich et al.) 193
Physisorption
Influence of polymer preadsorption on the performance of an electrochemical serum biosensor (Brett et al.) 311
Plant protoplast
Electrorotation of barley mesophyll protoplasts (Kakutani et al.) 85
Plasmalemma
Sugar absorption and potassium channels in protoplasts of *Hevea brasiliensis* laticiferous vessels (Bouteau et al.) 213
Polarization
Regularities of separate and combined effects of circularly polarized millimeter waves on *E. coli* cells at different phases of culture growth (Belyaev et al.) 49
Polymer-modified electrodes
Influence of polymer preadsorption on the performance of an electrochemical serum biosensor (Brett et al.) 311
Potassium channels
Sugar absorption and potassium channels in protoplasts of *Hevea brasiliensis* laticiferous vessels (Bouteau et al.) 213
Protein Synthesis
Similarities in the proteins synthesized by *Sciara* salivary gland cells in response to electromagnetic fields and to heat shock (Blank et al.) 27
Protoplast
Sugar absorption and potassium channels in protoplasts of *Hevea brasiliensis* laticiferous vessels (Bouteau et al.) 213
Psoralen
Pre-irradiated photo-oxidized psoralen induces hemolysis and changes in electrical parameters of erythrocyte membranes (Wunderlich et al.) 193
Reaction entropies
Reaction entropies for the O_2/O_2^- redox couple in aprotic solvents (Ohsaka et al.) 289
Redox gradient
Active transport of protons and electrons driven by redox enzyme reactions via a cofactor shuttle (NADH/NAD), a model: kinetics of activity and evolution of redox potential gradients (Demmano et al.) 271
Resealing process
Effect of electrical energy on the electropermeabilization of yeast cells (Muraji et al.) 77
Resonance effects
Regularities of separate and combined effects of circularly polarized millimeter waves on *E. coli* cells at different phases of culture growth (Belyaev et al.) 49

Salivary gland
Transcription in *Drosophila melanogaster* salivary gland cells is altered following exposure to low frequency electromagnetic fields: analysis of chromosomes 2R and 2L (Weisbrot et al.) 39
Scaria salivary gland cells
Similarities in the proteins synthesized by *Sciara* salivary gland cells in response to electromagnetic fields and to heat shock (Blank et al.) 27
Sensor
A new strategy for the construction of a tyrosinase-based amperometric phenol and *o*-diphenol sensor (Cosnier, Innocent) 147
Specific interaction
Interaction between a sulfolipid of the thylakoid membrane and atrazin (Temsamani et al.) 179
Spirobenzopyran
Conformational change of photochromic spirobenzopyran in a bilayer lipid membrane observed via the current of ion-carriers (Toyama et al.) 161
Sucrose/H^+ symport
Sugar absorption and potassium channels in protoplasts of *Hevea brasiliensis* laticiferous vessels (Bouteau et al.) 213
Sugar absorption
Sugar absorption and potassium channels in

protoplasts of *Hevea brasiliensis* laticiferous vessels (Bouteau et al.) 213

Sulfolipid

Interaction between a sulfolipid of the thylakoid membrane and atrazin (Temsamani et al.) 179

Thylakoid membrane

Interaction between a sulfolipid of the thylakoid membrane and atrazin (Temsamani et al.) 179

Transcription

Transcription in *Drosophila melanogaster* salivary gland cells is altered following exposure to low frequency electromagnetic fields: analysis of chromosomes 2R and 2L (Weisbrot et al.) 39

The effect of low frequency electric and magnetic fields on gene expression in *Saccharomyces cerevisiae* (Weisbrot et al.) 167

Tryptophan

Investigation of the electrochemical behavior of tryptophan by in situ circular dichroic spectroelectrochemistry (Zhu et al.) 301

Tyrosinase

A new strategy for the construction of a tyrosinase-based amperometric phenol and *o*-diphenol sensor (Cosnier, Innocent) 147

Vesicles

Electrorotation behavior of aggregated particles. A theoretical study (Donath et al.) 115
